Office seal:

Note: In case it is not possible to obtain the signature of a particular author for reasons beyond his/her reach, the reasons thereof should be explained.

## **GUIDELINES FOR THE PREPARATION OF MANUSCRIPT**

1. Title of the article should be short, specific, phrased to identify the content and indicate the nature of study.
2. Names should be in capitals prefixed with initials and separated by commas. For more than two authors the names should be followed by 'and' in small letters before the end of last name. Full address of the place of research in small letters should be typed below the names. Present address and E-mail ID of the authors may be given as foot note.
3. The full length paper should have the titles **ABSTRACT, MATERIALS AND METHODS, RESULTS AND DISCUSSION, REFERENCES**-all typed in capitals and bold font - 12. The research note will have only one title **REFERENCES**.
4. **ABSTRACT:** The content should include the year, purpose, methodology and salient findings of the experiment in brief not exceeding 200 words. It should be so framed that the reader need not refer to the article except for details.
5. **INTRODUCTION:** Should be without title and indicate the reasons which prompted the research, objectives and the likely implication. The review of recent literature should be pertinent to the problem. The content must be brief and precise.
6. **MATERIALS AND METHODS:** Should include very clearly the experimental techniques and the statistical methods adopted. Citation of standard work is sufficient for the well known methods.
7. **RESULTS AND DISCUSSION:** Great care should be taken to highlight the important findings with support of the data well distinguished by statistical measures like CD, r, Z test etc. Too descriptive explanation for the whole data is not desirable. The treatments should be briefly expressed instead of abbreviations like T<sub>1</sub>, T<sub>2</sub> etc. The discussion should be crisp and relate to the limitations or advantages of the findings in comparison with the work of others.
8. **REFERENCES:** Literature cited should be latest. References dating back to more than 10 years are not desirable. **Names of authors, their spelling and year of publication should coincide both in the text and references.** The following examples should be followed while listing the references from different sources.

**Tables and Graphs:** The data in tables should not be duplicated in graphs and vice versa. Mean data for main treatment effects should be presented with appropriate SE $\pm$  and CD values wherever necessary. The 2 or 3 way tables should be furnished only if the results are consistent over years and are distinguished to have consideration of significant practical value. SE $\pm$  and CD values however, should be furnished in the tables for all interactions and should be explained in the results and discussion. The treatments should be mentioned at

least in short forms if they are lengthy, but not abbreviated as T<sub>1</sub>, T<sub>2</sub> and T<sub>3</sub> etc. The weights and measures should be given in the metric system following the latest units eg. kg ha<sup>-1</sup>, kg ha<sup>-1</sup> cm, mg g<sup>-1</sup>, ds m<sup>-1</sup>, g m<sup>-3</sup>, C mol kg<sup>-1</sup> etc.

**Typing:** The article should be typed in 12 pt font on A<sub>4</sub> size paper leaving a margin of 5 cm on all sides. There should be a single line space between the rows in abstract and double line in rest. **Check up the manuscript thoroughly for errors before submitting it for publication.**

**Note:** Latest issue of the Journal may be consulted. Further details can be obtained from the book “Editors style Manual, edn 4. American Institute of Biological Sciences, Washington DC”.

## REVIEW PROCESS

The article will be initially screened by the editors. It will be sent to an expert for peer review only if it contains adequate original information and is prepared as per the guidelines. The author, then, may also be asked to revise it if the expert so desires. After getting the article suitably revised and edited, it will be placed before the editor for a final decision. The accepted article will be finally checked for language and grammar by the English editor before being sent to the press. The decision however to publish the paper lies with the editor even if the article is approved by the expert. Any article which is not able to meet the expected standard or is not prepared in conformity with guidelines will be rejected without assigning any reason.
